Work Experience

Front End Engineer / heycar UK
DEC 2021 — JAN 2023, LONDON/REMOTE

Built and maintained an e-commerce checkout journey using Next.js • Reduced the company's AWS costs by 30% by replacing an in-house image optimisation tool with a more performant Cloudinary solution • Introduced component testing with Cypress • Contributed to the efforts in creating international platform for heycar Group • Mentored junior team members

Website: https://heycar.co.uk

Junior Front End Engineer / heycar UK
MAR 2020 — DEC 2021, LONDON/REMOTE

Built a front-end global content delivery tool powered by GraphQL and headless CMS, which allowed content editors to produce over 600 custom SEO-friendly pages with no developer input • Worked in agile environment using Kanban method • Collaborated with UX Designers and Product Managers in delivering new features and improving site conversion

SEO Executive / ForwardPMX
SEP 2018 — MAR 2020, LONDON

Planned, developed and implemented SEO strategies for clients • Performed technical and on-page audits • Created AMP, UX and JavaScript crawling documentation • Built custom reports for the company's e-commerce clients using SQL • Organised SQL training sessions • Created Jira tickets for developers

Projects

Online store / Jusu Ziedas

An e-commerce website for a flower store in Lithuania • Server-side rendering and static site generation support via Next.js • Multi-language support using React-intl • E2E testing using Cypress • Serverless backend provisioned on AWS through CloudFormation • Payments integration with Stripe

Website: https://jusuziedas.lt
